**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 5,095,722 to Chapmond et al.

Chapmond et al. '722 disclose a strap (10) having first (figure 2; end of 10 near 12) and second (end of 10 near 14) ends; a first loop (12) for encircling a first end of an elongate object; a second loop (loop formed at right side of figure 2) interconnectable at one of a plurality of locations with the second end of the loop (multiple locations on 14 where 16 is able to be connected), the second loop being adjustable (adjustable since when 16 moves about different locations on 14 the size of the loop will change) for encircling a second end of an elongate object (figure 1); a lock (18).

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 5,095,722 to Chapmond et al. in view of U.S. Patent No. 4,366,605 to McKenney.  
Chapmond et al. '722 do not disclose a tether.

Art Unit: 3676

McKenney '605 teach a tether (8) including a stopper (11).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the device of Chapmond et al. '722 with a tether, as taught by McKenney '605, in order to provide additional security means.

*Allowable Subject Matter*

5. Claim 4 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

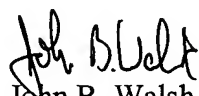

6. Claims 5-26 are allowed.
